Power/High Pass Filter Switch

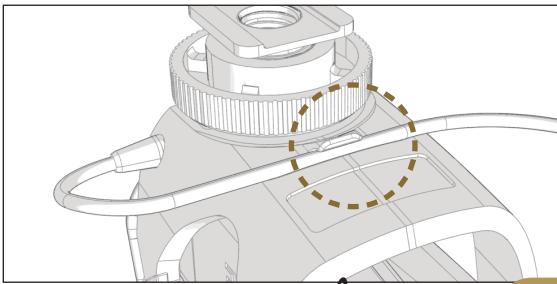

Mic OFF      O      I      Mic ON (FLAT)

Mic ON (HPF)

The High Pass Filter is a low frequency cutoff, which you can use to remove low frequency noise such as rumble from recordings.

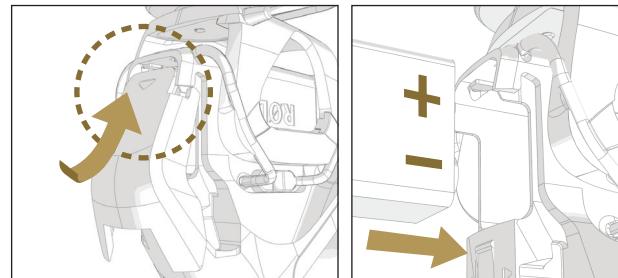

Controls

Ensure cable is secured in the clip to reduce handling noise.

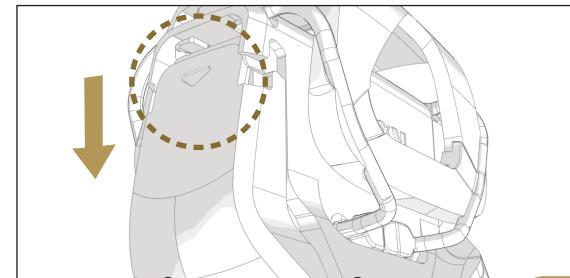

Cable clip

Insert battery positive side down. Replace battery cover, bottom first.

Installing the battery

To remove the battery cover, push up from the bottom.
